 [Portfolio/krutik-naina](#)

Summary

Full Stack Developer with hands-on experience building production-ready web applications using the **MERN stack**. Experienced in developing scalable frontend and backend systems, RESTful APIs, PostgreSQL databases, and cloud-based applications through live industry projects and personal SaaS products. Passionate about building high-performance, user-centric software and continuously learning modern technologies.

Education

Master of computer Application CGPA : 6.9	Marwadi University (NAAC A+) (2024-2026)
Bachelor of computer Application CGPA : 7.3	Saurashtra University (2021-2024)

Technical skill

- **Front-End:** HTML, CSS, JavaScript, Bootstrap, React.js, Tailwind Css
- **Backend :** Python, Node.js, Express.js
- **Databases:** MySQL, SQLite, MongoDB
- **Infrastructure & Queues:** Redis, BullMQ (Queue Management), REST APIs
- **Cloud & Deployment:** AWS SES, DigitalOcean, Vercel, Microsoft Azure
- **Authentication & Security:** JWT, Google OAuth 2.0
- **Tools & Version Control:** Git, GitHub, Postman
- **Soft Skills:** Team work, Problem solving, System Thinking, Team Collaboration

Experience

AnantaX Technologies **Feb 2026 – Present (6-Month Internship)**

Full Stack Developer Intern (MERN Stack)

- Working as a Full Stack Developer Intern using the PERN Stack (PostgreSQL, Express.js, React.js, and Node.js).
- Developing and maintaining frontend and backend applications.
- Building and integrating RESTful APIs with PostgreSQL databases.
- Implementing responsive user interfaces and server-side functionality.
- Collaborating with the development team to develop new features, resolve issues, and optimize application performance.

Project Work

Swadesh POS | [Live Link](#)

AnantaX Technologies | March 2026 – Present

- Developed the complete full-stack Swadesh POS web application using the PERN Stack.
- Built and maintained the frontend, backend, and PostgreSQL database integration.
- Developed and managed RESTful APIs for seamless communication between applications.
- Developed and maintained backend services for the Swadesh POS Web Application, Mobile Application, and Waiter Application, ensuring seamless API integration across platforms.
- Designed and implemented JWT-based authentication with Role-Based Access Control (RBAC) for a multi-tenant POS system, supporting Super Admin, Tenant Admin, and Tenant Staff roles.

- Fixed production issues, optimized application performance, and maintained the live production system.

MailCraft - Email Infrastructure Platform | [Live Links](#) | Personal SaaS Project

Tech Stack: React.js, Tailwind CSS, Node.js, Express.js, MongoDB, Redis, BullMQ, AWS SES, Azure, JWT, Google OAuth, CI/CD, DigitalOcean, Vercel

- Built a full-stack email infrastructure platform supporting transactional emails, campaign sending, analytics, and developer-focused REST APIs.
- Designed a scalable job queue system using Redis and BullMQ for scheduling, retries, rate limiting, and background processing.
- Integrated AWS SES and Azure-based email services with verified domain workflows, suppression handling, and delivery tracking systems.
- Implemented delivery pipelines using AWS SES with domain verification, suppression handling, and failure tracking.
- Optimized system to run with minimal cloud cost during idle states while maintaining reliability under load.
- Used AI tools to debug issues, optimize code, and accelerate development across frontend and backend systems.
- Developed dashboard modules for analytics, campaign management, domain verification, and queue monitoring with responsive React-based UI.

VedAI - AI Chatbot Based on Hindu Scriptures (Bhagavad Gita & Vedas) | [Live Links](#)

Academic (MCA) Individual Project – Marwadi University

Tech Stack: MERN Stack, MongoDB Atlas, Google OAuth 2.0, Vercel, GitHub, Gemini API

- Developed an AI-powered spiritual assistant delivering contextual guidance using Bhagavad Gita shlokas and Vedic knowledge.
- Implement authentication and authorization using JWT and OAuth 2.0.
- Integrated Gemini API for conversational AI responses with dynamic prompt handling and contextual memory flows.
- Built secure authentication and responsive chat interfaces optimized for mobile and modern web experiences.

Hackathons

CODE CARNIVAL Season 02 – National Level 36-Hour Hackathon | Atmiya University, Rajkot

- Represented Marwadi University in a 36-hour national-level hackathon.
- Collaborated with a team to develop an innovative solution for a real-world challenge.

Intellify 3.0 – National Hackathon | Marwadi University

- Developed a Smart Inventory Management System using QR Code technology.
- Collaborated with a team to build and present a working prototype.

Hack The Mountains (HTM 5.0) | Marwadi University

- Participated in a national-level hackathon and collaborated with a team to develop an innovative solution within a limited timeframe.
- Gained hands-on experience in rapid prototyping, teamwork, problem-solving, and modern software development practices.

Certifications

Google GenAI Study Jam | Google Developer Groups – Marwadi University | [Certificate](#) [Sep 2024]

Complete Front-End Development Journey | Infosys Springboard | [Certificate](#) [Oct 2024]
